1 Overview

This manual describes operating procedures of Button Menu for PJLinkTEST4CNT.

2 Main Window

The following window will be displayed when you activate PJLinkTEST4CNT.

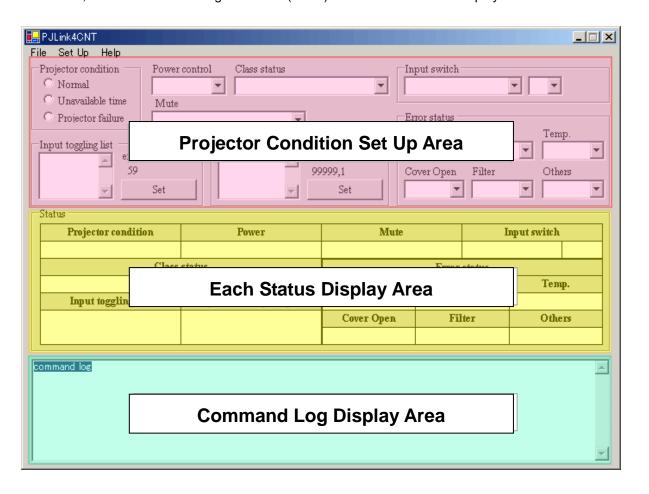

PJLinkTEST4CNT consists of three main areas.

The top of the window (pink area) is a "Projector Condition Set Up Area", and the middle of the window is a "Each Status Display Area", and the bottom of the window is a "Command Log Display Area".

The controls for setting up the projector condition will be gathered at the top of the window (pink area), and the current status of the projector set up in the top will be displayed in the middle of the window (yellow area).

PJLinkTEST4PJ and Communication log will be displayed in the bottom of the window (green area).

In addition, the name of the configuration file (*.PJF) in current use will be displayed in the title bar.

3 Menu Bar

File

Name of Main Menu	Name of Menu	Contents of Process
File	Load	Choose an ini file, and load the specified ini file.
	Save	Save the current settings to the ini file.
	Save As	Save the current settings as a new file.
	Exit	Exit out of the system.
Set Up	Network	Set up about port numbers and authentication.
· ·		Set up basic information for the projector.
	Test set up	Set up various test information.
Help	Version	Display version information.

3.1 Network

Network Set Up Items

PJLink Port No	Set up port numbers used in PJLink.	
Password	Set up the password used in authentication.	
	* The password will not be displayed as "***". It will be displayed as a plain	
	text.	
Authentication	Display Authentication settings in Test settings.	

3.2 Projector

Projector Set Up Items

Projector name	Set up the projector name.
Maker name	Set up the maker name.
Model	Set up the model name.
Other Info.	Set up other information.

3.3 Test set up

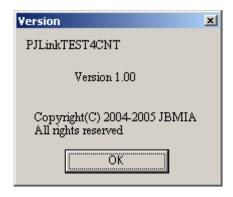

Test set up Set Up Items

Authentication	Set up whether to conduct authentication.
	Choose from the following options.
	Conduct authentication (ON) / Do not conduct authentication (OFF) / Random

Test method	Check this box when you want to execute Random test.
Error transmission	Set up whether to execute error transmission.
	Choose from the following options.
	Execute error transmission (ON) / Do not execute error transmission (OFF) /
	Random (Random).
Time non-guaranteed	Set up Time non-guaranteed.
[after power ON]	
Test file Display the script file used in total test.	
File Selection	Display the dialog to choose the script file used in total test.

3.4 Version

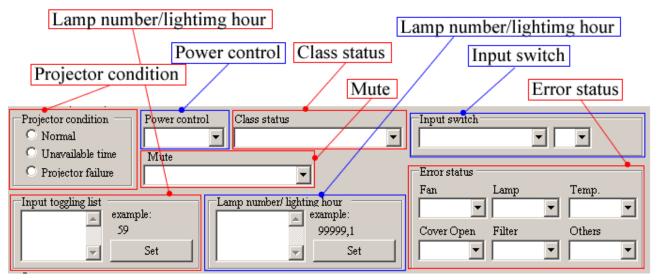

Version information will be displayed.

4 Projector Condition Set Up Area

The following projector condition can be set at Projector Condition Set Up Area.

When the contents of the following items other than "Input toggling list" and "Lamp number/lighting hour" are changed, it will be immediately reflected in the settings.

When the contents of "Input toggling list" and "Light number/lighting hour" are changed, it will be reflected in the settings by clicking Set button on each item.

Set Up Items	Contents	Remarks
Projector Projector condition Normal Unavailable time Projector failure	Set up the projector condition.	Choose from the following options. Normal / Unavailable time / Projector failure
Power Control Power control	Set up the power condition for the projector.	Choose from the following options. Power ON / Power OFF / Cooling / Warning.
Class status Class status	Set up the support condition for the class.	Choose from the following options. Class-2-compatible projector / Class-2-incompatible projector.
Mute	Set up the Mute condition.	Choose from the following options. Video mute ON / Video mute OFF / Audio mute ON / Audio mute OFF / Video and Audio mute ON / Video and Audio mute OFF

Set Up Items	Contents	Remarks
Input switch	Set up the input source.	Choose from the following options. RGB / VIDEO / DEGITAL / STRAGE /
Input switch		NETWORK.
		In addition, choose from 0 to 9.
Input toggling list	Set up the source list which	【Set Up Example】
Input toggling list example: 59 Set	enables input toggling.	As described above, input each input source by separating with line feeds.
Lamp number/lighting hour	Set up the lamp integrating	Set up the source ranges from 10 to 59.
Lamp number/lighting hour Lamp number/lighting hour example: 99999,1 Set	Set up the lamp integrating time and lighting status.	[Set Up Example] 99999,1 11111,0 22222,1 Lamp integrating time, Lighting status Input integrating time and lamp lighting status separated by "," (a comma). Input each lamp separated by line feeds. Integrating time: Settable from 0 to 99999. Lamp status: 1:Lighting, 0: Extinction
Error status Error status Fan Lamp Temp. Cover Open Filter Others	Set up each error status.	For Fan, Lamp, Temp, Cover Open, Filter, Others, choose from the following items. No error / Warning / Error
